

Mid-Range/Tweeter Speaker

We design your Realistic® Mid-Range/Tweeter Speaker for space-saving efficiency, wide response, and low distortion.

- **Tuned Sub-Enclosure**—provides combined midrange and tweeter response.
- **Compact Design**—lets you build a full-range sound system in a limited space.

INSTALLING THE SPONGE CUSHION

We included a sponge cushion with your speaker. This cushion helps prevent the speaker's frame from vibrating against its enclosure.

To install the cushion:

1. Remove the cutout portions of the cushion, as shown.

2. Remove the paper backing from the cushion to expose the adhesive surface.
3. Press the cushion onto the speaker's frame, making sure the cutout holes align with the four screw holes.

CONNECTIONS

You can use your Mid-Range/Tweeter Speaker in a two-way system as shown.

Caution: Be sure you *always* use the supplied cross-over capacitor. If you do not use the capacitor, low-frequency signals can damage your Mid-Range/Tweeter Speaker's voice coil.
